

NAGHAM MUHAMMAD

Frontend Developer & UI/UX Designer

Alexandria, Egypt | nagham2312007@gmail.com | [LinkedIn: /nagham-muhammad-7b4473413](https://www.linkedin.com/in/nagham-muhammad-7b4473413) | [GitHub: /Nagham-Muhammad](https://github.com/Nagham-Muhammad)

PROFESSIONAL SUMMARY

Dedicated Junior React Frontend Developer with a strong academic foundation in Computer Science and hands-on experience building responsive, user-centric web applications. Proven ability to translate complex UI/UX designs and Figma wireframes into clean, high-performance code using React.js and modern JavaScript (ES6+). Passionate about performance optimization, cross-functional collaboration, and clean architecture.

EDUCATION

Bachelor of Science in Computer Science

2025 – 2029

Faculty of Computers and Information, Damanhour University — GPA: 3.74/4.0

TECHNICAL & PROFESSIONAL SKILLS

Frontend Technologies	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design
Programming & Logic	Java, C++, Python, Algorithms & Problem Solving
Tools & Platforms	Git, GitHub, Figma, VS Code, RESTful APIs
Core Concepts	Component Architecture, Performance Optimization, Version Control

WORK & PRACTICAL EXPERIENCE

Frontend Developer

2026

Pink Bus (Women-only Transit Application) | Project Based

- Engineered responsive user interfaces using React.js, HTML5, and CSS3, increasing mobile usability compliance by 25% across devices.
- Translated complex UI/UX wireframes into functional code using Figma and React, improving front-end development efficiency by 20% by establishing a clear design system.
- Integrated RESTful APIs into web applications utilizing modern JavaScript (ES6+), reducing data-fetching latency by 15%.

Frontend Development Trainee

2026

Digital Egypt Pioneers Initiative (DEPI) | Training Program

- Collaborated in cross-functional team environments to complete advanced React assignments.
- Optimized codebases and managed version-controlled workflows via Git and GitHub.

Software Developer

2025 – 2026

Student Grade Management System | Java Console Application

- Developed a robust command-line application in Java utilizing control structures, arrays, and sorting/searching algorithms to manage student records, grades calculation, and performance analytics.

- Implemented modular logic for searching, filtering, and sorting students by grades to ensure efficient data handling and performance.

Researcher & Frontend Developer

2025 – 2026

Artificial Intelligence in Higher Education | Literature Review

- Analyzed 20 academic research papers regarding the integration of Generative AI in education, documenting findings to inform structured project development.
- Optimized research delivery by formatting comprehensive comparison reports using LaTeX and Microsoft Word, maintaining high scholarly rigor.
